At FACELAB we restore the beauty of your skin and face using methods that are **safe, effective, scientifically proven** with **short or no downtime** ... and the results are **natural, long lasting, and individual** to you.

# AGEING SKIN & WRINKLES

**Ageing** is characterised by thinner, drier and less elastic skin caused by the loss of collagen and elastin from sun damage, and/or physiological degradation and dehydration.

This reduction in the quality and firmness, or resilience, of the skin means that it has poor elastic memory and is less able to repair itself when it folds repeatedly from muscle action, leaving a visible crease line that becomes a wrinkle as it gets deeper with time.

## COSMETIC INJECTIONS:

Cosmetic injections contain a substance that reduces contraction of very specific muscles that causes the skin to fold. The effects last for about 4 months, after which time the procedure needs to be repeated. With time there is often a decrease in the required dosage, and an increase in the period between treatments. At FACELAB the treatments are performed by expert aesthetic clinicians who have intimate knowledge of the structures that make up the face, and who are qualified dentists or doctors with specific post-graduate training in advanced facial aesthetics. When the right muscles are correctly targeted, the result is a smoother fresher look rather than one which is unnatural or frozen.

## LASER REJUVENATION

FACELAB's medical grade Er:YAG, Nd:YAG and Q-switch laser systems enable precision, versatility and effects that are impossible to achieve with any other skin rejuvenation technology. The laser light precisely targets areas of the skin where skin ageing has occurred. The treatments help revive the quality of the skin by eliminating damaged tissues, stimulating the formation of new collagen and promoting regeneration of the skin surface. These lasers are also used to specifically target tiny blood vessels, sun spots, age spots, various other pigmentation changes, as well as facial hair, all of which occur with ageing.

## MICRO-NEEDLING

In certain situations, such as dark skin types, which have a higher affinity to laser light, micro-needling may be used instead of, or intermittently with lasers to induce collagen. It is also used for to stimulate scalp hair follicles for hair regeneration.

## COSMECEUTICAL SKIN CARE PRODUCTS

FACELAB's range of products is selected through a process of internal testing and review by professional dermal clinicians and beauty therapists. We only look for safe, quality ingredients and the most effective combinations for each individual skin condition to help with post-treatment recovery and long-term maintenance of beautiful healthy skin.

# DISCOVER YOUR *TruSkin Age*™

Reveal the hidden effects of sun exposure and the ageing process on your face with FACELAB's world-class digital skin scanner, and discover the treatments available for looking good.

### Complexion Analysis

Depending on your individual needs, your consultation process may include an analysis of your complexion with our VISIA digital skin scanner.

The complexion analysis provides our clinicians with a detailed overview of your skin and allows them to make the most suitable recommendations for treatments as well as skin care products personalised for your skin type.

### Relative Skin Age

The digital analysis includes pigmented spots, wrinkles, skin texture, pores, sun spots, age spots, vessels, areas of inflammation, as well as porphyrins (bacterial excretions).

These parameters are then analysed in the software against others your age producing your comparative Trueskin Age and an overall assessment of your skin's condition.

At **FACELAB** we care to restore the beauty of your skin and face using methods that are safe, effective, scientifically proven with short or no downtime ...and results that are **natural, long lasting,** and **individual** to you.

#### REJUVENATION

Full face, neck, under eyes and upper lip. Reduction of fine lines, wrinkles and sagging contours of tired looking skin. Effective treatment of all types of scars including acne. Damaged skin is replaced with fresh collagen deposition to reduce the appearance of indentions and uneven skin.

#### STRETCH MARK THERAPY

Stretch marks can be improved by stimulating dermal collagen formation in desired regions which thickens the skin causing stretch marks to fade with time. Improvement continue over a period of 6-8 weeks after treatment while collagen remodeling takes place.

#### HAIR LOSS

Micro needling is used as a collagen induction therapy in treatment of hair loss. It achieves results by stimulating blood flow to treated area as well increasing nutrient and growth factor availability.

Fees per session/treatment area:

FACE/BODY      \$350

HAIR LOSS      \$230

# COSMETIC INJECTIONS

## Anti-Wrinkle

Frown Lines

Crows Feet

## REFRESH PACKAGE

\$476

Refresh package includes any or all of the areas specified above (Frown Lines, Crows Feet, Forehead Lines, Eyebrow Lift) subject to suitability following assessment, to a maximum of 40 units, which is the typical dose for an average person. Other areas on the face may be treated individually, or as add-ons to the REFRESH package.

### ADD ON

Additional Treatments	Individual	As Add-On
Radial Lip Lines	\$190	\$155
Gummy Smile	\$380	\$280
Jaw Mass Thinning and Clenching Management		
Basic   50 Units	\$500	\$440
Advanced   80 Units	\$764	\$704

Forehead Lines

Eyebrow Lift

ENHANCEMENTS

\$8.80 per unit

Within two weeks of  
initial treatment

BUNDLES THAT INCLUDE  
MULTIPLE REFRESH PACKAGES

DASH & GO (AGES 30+)

Facial rejuvenation & maintenance program that includes cosmetic injections, cheekbone & jawline enhancement and laser peels to keep you looking fresh and rested over an 18 month period

**\$1,550** + \$250 monthly  
for 12 months

TOTAL SAVING \$1,104

reWIND (AGES 45+)

Anti-wrinkle, anti-sagging, and anti-ageing treatments that include cosmetic injections, cheekbone & jawline enhancement, laser skin tightening and thread-lift tightening for looking your best over 18 months

**\$2,370** + \$280 monthly  
for 12 months

TOTAL SAVING \$1,254

LASER REJUVENATION

## STEP 1. HOLLYWOOD CARBON PEEL

A layer of liquid carbon is applied to the skin, which penetrates deep into the pores. The Carbon particles attach to dead skin cells and absorb the oil and contaminants within the pores. A Q-switch Nd:YAG laser specifically targets the carbon particles, and as it destroys these particles, it removes the attached dead skin cells, contaminants and oil.

Along with the cleansing and exfoliation of the skin, the heat produced from the carbon peel reduces P.Acnes bacteria responsible for acne, and shrinks sebaceous glands resulting in reduced secretion of oil, thus reducing the chances of breakouts.

**Suitable for:** Normal to Oily Skin Types

**Indications:** Oily & Dull Skins , Enlarged Pores, Blackheads, Acne

## STEP 2. PHOTOACOUSTIC TONING

A different kind of laser is then used, which targets sun damaged skin, age-related pigmentation and Melasma. The result is a more even tone and brighter skin.

**Suitable for:** All Skin Types

**Indications:** Sun Damaged Skin, Age Related Pigmentation, Melasma

### Recommended No. Sessions

You will experience noticeable results after a single session, but for best long-term results we recommend repeating the treatment every 2-3 months, along with the use of sunscreen and a good skin-care regime as recommended by our therapists for your skin type.

Treatment	Per Session
Hollywood Carbon Peel	\$300
Photoacoustic Toning	\$250
<b>Hollywood Dual Peel Package</b>	
Steps 1 + 2 Combined	\$500

AVAILABLE IN  
BUNDLE

**DASH & GO**

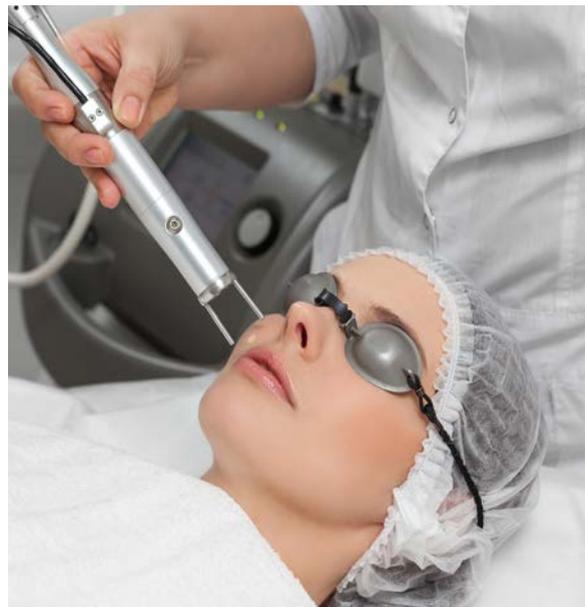

See page 6

Gentle yet effective Er:YAG laser-peel targeting superficial and deeper layers of the skin to stimulate collagen synthesis. This treatment promotes skin tightening and regeneration without ablation (removing the surface layer) or the associated downtime.

**Suitable for:** All Skin Types and All Ages

**Indications:**

- ✓ **ANTI-AGEING**
- ✓ **COLLAGEN REMODELLING**
- ✓ **SKIN TONE / TIGHTENING**
- ✓ **IRREGULAR SURFACE**
- ✓ **TEXTURE**
- ✓ **DRYNESS OF SKIN**
- ✓ **PORE REDUCTION**
- ✓ **MILD WRINKLES**
- ✓ **EXTENDS RESULT OF ABLATIVE LASERS**

Treatment	Per Session
Peel (excl. eyes)	\$380
Dark eye circles or eye bags	\$380
Face/Neck/Body Skin Tightening (per area)	\$280
Lip Plumping	\$220
<b>Recommended No. Sessions</b>	
2-4 Treatments 2-4 weeks apart. Repeat 12-18 months or as necessary	

For patients wanting effective facial rejuvenation with minimal downtime.

## Step 1. FRAC3 ANTI AGEING BOOST

Multi-pass FRAC 3 treatments stimulate the skin’s natural capacity to rejuvenate by selectively inducing micro wounds in prematurely aged or damaged portions of the dermis and epidermis. The laser action creates 3-dimensional matrix of micro wounds which are concentrated at the specific depths of the existing skin damage. It is a gentle, non-ablative anti-ageing treatment with no downtime and little risk.

**Indications:** Collagen Remodelling, Rosacea, Broken Vessels

## Step 2. VERSA T3 MICRO-VASCULAR REJUVENATION

VERSA T3 is a low downtime treatment based on absorption of Nd:YAG laser energy by haemoglobin with partial coagulation of the microvasculature in the papillary dermis and release of inflammatory mediators. The process results in micro-vascular renewing, fibroblast stimulation and new collagen remodelling. The end result will be smoother skin and smaller pore sizes, characterised by improvement in skin Tightness, Tone and Texture (“T3”).

**Indications:** Skin Tone, Pore Reduction, Rosacea

## Step 3. SMOOTH LASE PEEL (see prior page)

**Indications:** Skin Tone, Pore Reduction, Mild Wrinkles, Dryness, Anti-Ageing, Irregular Skin Texture

Wrinkles will continue to visibly decrease over the 12 months after the initial treatment, as the natural rejuvenation process takes place.

Treatment Fees	Per Session
Anti-Ageing Boost (Step 1)	\$380
reLASE (Steps 1+2)	\$480
RADIANCE Rejuvenation (Steps 1+2+3)	\$680
<b>Recommended No. Sessions</b>	
2-4 treatments 1 month apart. Repeat after 12-18 months or as necessary.	

AVAILABLE IN  
BUNDLE

**DASH & GO**  
See page 6

FACELAB  
AESTHETIC & DERMAL CLINIC

Ideal for patients who want drastic rejuvenation effects, but who are not inclined towards aggressive surgical or chemical alternatives. Results and downtime may be graded to individual needs.

## Step 1. FRAC3 ANTI AGING BOOST

See P. 11 Radiance Rejuvenation

## Step 2. VERSA t3 MICRO-VASCULAR REJUVENATION

See P. 11 Radiance Rejuvenation

## Step 3. FRACTIONAL ABLATION

Old, worn-out skin is ablated away by a fractional Er:YAG laser creating precise micro-channels. These channels will be replaced with new, tighter and healthy tissue as the new skin forms.

## Step 4. LASER PEEL SKIN RESURFACING

The skin is ablated with a light full Er:YAG beam, which finishes the treatment and removes superficial imperfections.

Suitable for: All Skin Types

Indications: Deeper Rejuvenation, Wrinkle Reduction, Acne Scarring

Before

After

- ✓ **SUN DAMAGE**
- ✓ **SKIN TONE & PORE SIZE**
- ✓ **PIGMENTATION**
- ✓ **COLLAGEN REMODELLING**
- ✓ **WRINKLES**
- ✓ **SCARRING**

---

## ULTIMATE GLOW REJUVENATION

\$900 / Session

For effective results we recommend repeating every 12-18 months

Anti-wrinkle and Tightening using a unique combination of four distinct modes of aesthetic treatment harnessed in concert to combat facial aging.

### COLLAGEN LASER-INDUCTION THERAPY

Controlled and gentle Er:YAG laser therapy from inside the mouth causing bulk heating to stimulate collagen and general tissue contraction.

### FRAC3 ANTI-AGEING BOOST

Targeted treatment of specific deeper imperfections in the skin, like spots and tiny vessels, to rejuvenate the skin and restore youthful texture.

### PIANO TIGHTENING

A unique laser mode concentrating the laser energy to deeper layers, which provides an outstanding tightening effect for areas experiencing skin laxity.

### SUPERFICIAL PEEL

The final stage is like a polishing effect for your skin by removing dead skin cells to reveal the brighter, healthier tissue below and provide a noticeable "glow" to your skin.

### FRACTIONAL RESURFACING (Optional)

Fractional micro-channel ablation of ageing or damaged skin allowing deeper penetration for the most effective collagen stimulation and skin surface regeneration. This optional stage may result in slightly longer downtime and is done prior to the peel.

AVAILABLE IN  
BUNDLE

reWIND  
See page 6

### 4-D LASER FACELIFT

\$750 / Session

PLUS \$430

for FRACTIONAL RESURFACING

For effective results we recommend  
2-4 treatments 1-2 months apart

FACELAB  
AESTHETIC & DERMAL CLINIC

Using the versatile parameters of FACELAB's laser systems, we are able to target pigmentation at various depths/layers of the skin and effectively treat conditions such as melasma, sun spots, uneven dark patches as well as cosmetic colour correction to whiten and brighten the skin. The natural pigment within the skin absorbs the laser's energy and shatters within the skin's tissues.

The rest is done by the body's own immune system as the skin's cleansing cells, called "macrophages," digest the excess pigment and clear it from the area. The treatment is quick and painless. Usually sun spots require only one or two treatments for removal, although larger, darker spots and full skin whitening require more. Once treated the pigmentation will not return. However laser treatment cannot stop the ageing of the skin and other age spots will appear in time, and can be addressed again if and when desired.

- ✓ **SUN SPOTS**
- ✓ **AGE SPOTS**
- ✓ **COLOUR CORRECTION**
- ✓ **SKIN WHITENING**
- ✓ **MELASMA**

### MULTI-LAYERED ANGEL SKIN WHITENING

Depigmentation  
of the skin by  
targeting pigment  
in multiple depths

**\$690**  
per session

Treatment Fees	Per Session
Spot Treatment (5x5mm)	\$80
<b>Photoacoustic Toning</b>	
Full Face (Neck & Decolletage add \$100)	\$250
<b>Skin Whitening or Dual Depth Green Toning</b>	
Full Face (Neck & Decolletage add \$140)	\$310
<b>Recommended No. Sessions</b>	
1-4 treatments 1-2 month apart.	

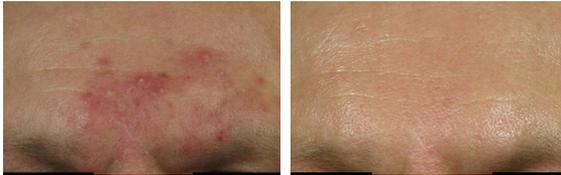

## SPECIFIC CONCERNS

### BLOOD VESSELS & VASCULAR LESIONS

LASER TREATMENT \$80 / 5x5mm

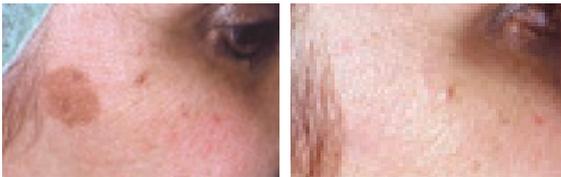

---

### ROSACEA

reLASE TREATMENT (p.11) \$480 / session

---

### PIGMENTED SPOTS

LASER LESION REMOVAL \$80 / 5x5mm

---

### BENIGN RAISED SKIN LESION

LASER LESION REMOVAL \$140 / 5x5mm

---

### WARTS

LASER LESION REMOVAL \$140 / 5x5mm

---

### ACNE

ACNE TREATMENT \$200 / session

---

### ACNE SCARRING

FRACTIONAL LASER TREATMENT \$600 / session
