

FACELAB
AESTHETIC & DERMAL CLINIC

Body Sculpt

World's most advanced non-surgical
Fat Reduction & Body Tightening

for MEN & WOMEN

FACELAB

AESTHETIC & DERMAL CLINIC

A unique combination of advanced Laser and Radio-Frequency lipo-sculpting therapies to permanently destroy fat in problem areas, such as abdomen, hips, thighs, upper arms and double-chin.

Step 1

Radio-Frequency Fat-Reduction

- Non-invasive & no downtime
- Can be performed simultaneously with facial rejuvenation treatments or laser sculpting of other area
- You don't need to get undressed for the treatment

The treatment causes fat cell disruption. These cells will not regenerate and are gone for good, unless you experience a dramatic lifestyle change.

\$190
per session

Step 2

optional

Laser Tight-Sculpting

Laser targeting of the more superficial layers of fat, and tightening of the skin to prevent sagging and wrinkling following weight loss.

\$340
per session
